

Pentagon Preparing For A Nuclear War? U.S. Military Testing By Dropping “Fake Nuclear Bombs” In The Nevada Desert

Or Wants More Funds For The Military-Industrial Complex?

The psychopaths in Washington and in the pentagon is preparing for a nuclear confrontation with Russia with recent tests of two fake 700-pound nuclear bombs in the Nevada desert. Defense One, a U.S. Military website for the defense industry published an article by Marcus Weisgerber titled ‘The US Air Force Just Dropped Two Fake Nukes’ on October 6th and stated “A pair of U.S. Air Force B-2 bombers dropped two 700-pound faux nuclear bombs in the middle of the Nevada desert within the past few days. Now the Pentagon wants to tell you about it.”

The Pentagon not only wants the public to know about these tests but also to warn Russia that it is testing its old version of the B61 nuclear bombs to pinpoint the accuracy and reliability in case of a real world war III scenario were to take place.

OCTOBER 6, 2016

A pair of U.S. Air Force B-2 bombers dropped two 700-pound faux nuclear bombs in the middle of the Nevada desert within the past few days. Now the Pentagon wants to tell you about it.

A press release by the National Nuclear Security Administration(NNSA) on the same day stated the following:

« In collaboration with the U.S. Air Force Global Strike Command, NNSA conducted successful surveillance flight tests using joint test assemblies (JTA) of the B61-7 and B61-11 earlier this month. Analysis and flight recorder data from the tests indicate that both were successful.

JTAs are mock weapons containing sensors and instrumentation that allow scientists and engineers from national laboratories to assess their performance. The assemblies contain no nuclear materials and are not capable of nuclear yield. These assemblies also include a flight recorder that stores bomb performance data for each test.

The primary objective of flight testing is to obtain reliability, accuracy, and performance data under operationally representative conditions. Such testing is part of the qualification process of current alterations and life extension programs for weapon systems. NNSA scientists and engineers use data from these tests in computer simulations developed by Sandia National Laboratories

to evaluate the weapon systems' reliability and to verify that they are functioning as designed ».

Weisgerber asked "But why now? Perhaps it has to do with tensions with Russia, which are higher than they have been in decades, and which have sparked fears of a new nuclear arms race."

Russia is also preparing for a worst case scenario as it announced a drill for its citizens in case Washington decides to launch a nuclear weapon into Russian territory. Washington has been threatening Russia over the civil war in Syria. Washington, Turkey.

Israel and Saudi Arabia have been the main supporters of al-Nusra and other terrorist groups since the start of the civil war in 2011 which has failed since Russia got involved in the conflict. The plan to remove Assad has failed and now Washington is escalating its war rhetoric against Russia. Another possible explanation for the nuclear weapons tests and they may have to do with more funding for the Military-Industrial Complex. Weisber said "But it may also have to do with the Pentagon's quest to replace its decades-old nuclear arsenal with new bombs and delivery vehicles, an endeavor whose price tag tops several hundred billion dollars." War is big business. War is profitable on many levels especially for arms manufacturers.

However, a war against Iran, China and Russia is on the table because they are the last remaining obstacles to Washington's global dominance. Washington is contemplating a possible nuclear war against their adversaries because their cadres of psychopaths are willing to unleash a nuclear disaster for the entire planet to achieve their stated goals. Can Russia bring peace and avoid World War III when the next regime to assume the White House comes to power this January?

If Hillary Clinton wins (or steals) the election, that question is not hard to answer especially with the neoconservative war hawks and special interest groups who support her. Clinton is a Democratic warmonger in her own right as the recent U.S. intervention in Libya proves what she is capable of. With a Trump presidency it is still vague on what type of foreign policy he would follow. However, U.S. Vice-Presidential candidate Mike Pence made it clear what he believes should be done in a recent U.S. televised debate regarding U.S.-Russia tensions in Syria:

« The United States of America needs to begin to exercise strong leadership to protect the vulnerable citizens and over 100,000 children in Aleppo. Hillary Clinton's top priority when she became secretary of state was the Russian reset, the Russians reset. After the Russian reset, the Russians invaded Ukraine and took over Crimea.

And the small and bullying leader of Russia is now dictating terms to the United States to the point where all the United States of America — the greatest nation on Earth — just withdraws from talks about a cease-fire while Vladimir Putin puts a missile defense system in Syria while he marshals the forces and begins — look, we have got to begin to lean into this with strong, broad-shouldered American leadership.

It begins by rebuilding our military. And the Russians and the Chinese have been making enormous investments in the military. We have the smallest Navy since 1916. We have the lowest number of troops since the end of the Second World War. We've got to work with Congress, and Donald Trump will, to rebuild

our military and project American strength in the world.

But about Aleppo and about Syria, I truly do believe that what America ought to do right now is immediately establish safe zones, so that families and vulnerable families with children can move out of those areas, work with our Arab partners, real time, right now, to make that happen.

And secondly, I just have to tell you that the provocations by Russia need to be met with American strength. And if Russia chooses to be involved and continue, I should say, to be involved in this barbaric attack on civilians in Aleppo, the United States of America should be prepared to use military force to strike military targets of the Assad regime to prevent them from this humanitarian crisis that is taking place in Aleppo.

There's a broad range of other things that we ought to do, as well. We ought to deploy a missile defense shield to the Czech Republic and Poland which Hillary Clinton and Barack Obama pulled back on out of not wanting to offend the Russians back in 2009 ».

Pence's statement is hawkish which proves that whether Hillary Clinton or Donald Trump (who is also surrounding himself with neoconservatives such as former CIA director James Woolsey as his senior adviser and Joseph Schmitz who was a Defense Department inspector general under President George W. Bush), 2017 is sure to be a politically intense year for the World. Will it be peace or war? Washington's reckless drive to World War III needs to be stopped in its tracks; let's hope Russia and its allies can deter such a scenario.
