GR Editor's Note : the UN fails to acknowledge that these casualties are the product of a US-NATO led war. and that « the acts of terrorism, violence and armed conflict in Iraq » are the result of a military and intelligence agenda which consists in financing and supporting terrorism as an instrument of destabilization and conquest. What we are dealing with is the Tabulation of War Crimes.

A total of 849 Iraqis were killed and another 1,450 were injured in acts of terrorism, violence and armed conflict in Iraq in January 2016, according to casualty figures released today by the United Nations Assistance Mission for Iraq (UNAMI).*

The number of civilians killed in January was 490 (including 24 federal police, Sahwa civil defence, Personal Security Details, facilities protection police, fire department), and the number of civilians injured was 1,157 (including 47 federal police, Sahwa civil defence, Personal Security Details, facilities protection police, fire department).

A total of 359 members of the Iraqi Security Forces (including Peshmerga, SWAT and militias fighting alongside the Iraqi Army but excluding Anbar Operations) were killed and 293 were injured.

The Special Representative of the United Nations Secretary-General for Iraq (SRSG), Mr. Ján Kubiš, deplored the continuing high casualty toll, particularly a sharp increase in the number of injuries among civilians in January as compared to the previous month.

“One casualty is one too many. The suffering of the Iraqi people must end,” the SRSG said. “Iraqis, civilians in particular, continue to pay the price in this conflict. The Iraqi people should have the opportunity to live in peace and security.”

The figures showed that Baghdad Governorate was the worst affected, with 1,084 civilian casualties (299 killed, 785 injured), Diyala 61 killed and 79 injured, Ninewa 55 killed and 24

injured, while Kirkuk had 12 killed and 3 injured, and Salahadin 2 killed and 14 injured.

According to information obtained by UNAMI from the Health Directorate in Anbar, in January 2016 the Governorate suffered a total of 304 civilian casualties (56 killed and 248 injured). Anbar casualty figures cover the period from 1-30 January, inclusive.

*CAVEATS: In general, UNAMI has been hindered in effectively verifying casualties in conflict areas. Figures for casualties from Anbar Governorate are provided by the Health Directorate. Casualty figures obtained from the Anbar Health Directorate might not fully reflect the real number of casualties in those areas due to the increased volatility of the situation on the ground and the disruption of services.

In some cases, UNAMI could only partially verify certain incidents. UNAMI has also received, without being able to verify, reports of large numbers of casualties along with unknown numbers of persons who have died from secondary effects of violence after having fled their homes due to exposure to the elements, lack of water, food, medicines and health care. For these reasons, the figures reported have to be considered as the absolute minimum.
